Your Personal *Constitution*

This prompt builds your constitution *for* you. Paste it into Claude, answer the questions, and it writes a tight 400–500 word document you drop into your AI settings — so every conversation knows who you are and how you want to be spoken to.

HOW TO USE IT

1. Paste the prompt below into a new Claude chat.
2. Answer the questions — mostly multiple choice. Be honest; **it'll push back if you're vague.**
3. When it's written your document, copy it into **Settings > Profile > User Preferences.**
4. Done. It works in every conversation from that point on.

Paste everything below into any Claude conversation to begin

I want to build my Personal Constitution — a single document I will paste into my AI settings so that every conversation I have is informed by who I am, how I think, and how I want to be spoken to.

Do not write anything yet. Interview me in batches. Use multiple choice wherever possible — I can pick more than one. Push back if my answers are vague. Ask follow-up questions if something needs more depth. Only when you are confident you understand me well enough should you write the document.

The final output must be **400-500 words maximum**. It needs to be tight, specific, and useful — not inspirational. Every sentence should earn its place. An AI reading it should immediately understand who I am, what I value, and exactly how to work with me.

Before we begin — one question

- ☐ A — Diplomatic
- ☐ B — Direct
- ☐ C — Very direct
- ☐ D — Brutally honest (blunt but respectful)
- ☐ Other — describe it

PART 2 — WHO YOU ARE

Once Part 1 is answered I will ask you about yourself across these areas — a mix of multiple choice and open questions. I will dig deeper where needed.

- Who you are and what shaped you
- Your core values and what you will never compromise on
- Your most important roles (partner, parent, founder, etc.)
- Your ambition and relationship with money
- Your health and how you want to live
- Your blind spots and what tends to go wrong for you
- What a good life actually looks like for you
- Any permanent context about your work or life an AI should always know

THE OUTPUT

One document. 400–500 words. Written in third person. Clear headings, bullet points within each section. Direct and personal — not a template, not a motivational poster. It goes straight into your AI settings (Claude: Settings → Profile → User Preferences) and works immediately in every conversation from that point forward.

To start: answer the single question at the top, then work through Part 1. Claude takes it from there.
